Contents Volume 248 2003

Volume 248 Nos. 1–2

Structure and functioning of cluster roots and plant responses to phosphate deficiency

Guest editors:
H. Lambers & P. Poot

Introduction
H. Lambers, M.D. Cramer, M.W. Shane, M. Wouterlood, P. Poot and E.J. Veneklaas **ix-xix**

The biology of cluster roots and the acquisition of P from the rhizosphere

Structure, ecology and physiology of root clusters – a review
B.B. Lamont **1–19**

The evolution of physiology and development in the cluster root: teaching an old dog new tricks?
K.R. Skene **21–30**

Organic acid behavior in soils – misconceptions and knowledge gaps
D.L. Jones, P.G. Dennis, A.G. Owen and P.A.W. van Hees **31–41**

Origins of root-mediated pH changes in the rhizosphere and their responses to environmental constraints: A review
P. Hinsinger, C. Plassard, C. Tang and B. Jaillard **43–59**

Strategies to isolate transporters that facilitate organic anion efflux from plant roots
P.R. Ryan, B. Dong, M. Watt, T. Kataoka and E. Delhaize **61–69**

Phosphate transport in plants
F.W. Smith, S.R. Mudge, A.L. Rae and D. Glassop **71–83**

Development of the adhesive pad on climbing fig (*Ficus pumila*) stems from clusters of adventitious roots
E.P. Groot, E.J. Sweeney and T.L. Rost **85–96**

Pathways of carbon metabolism related to enhanced exudation of organic acids and acid phosphatase

Acclimation of white lupin to phosphorus deficiency involves enhanced expression of genes related to organic acid metabolism
C. Uhde-Stone, G. Gilbert, J.M.-F. Johnson, R. Litjens, K.E. Zinn, S.J. Temple, C.P. Vance and D.L. Allan **99–116**

Phosphorus deficiency-induced modifications in citrate catabolism and in cytosolic pH as related to citrate exudation in cluster roots of white lupin
A. Kania, N. Langlade, E. Martinoia and G. Neumann **117–127**

Secreted acid phosphatase is expressed in cluster roots of lupin in response to phosphorus deficiency
J. Wasaki, T. Yamamura, T. Shinano and M. Osaki **129–136**

Effects of altered citrate synthase and isocitrate dehydrogenase expression on internal citrate concentrations and citrate efflux from tobacco (*Nicotiana tabacum* L.) roots
E. Delhaize, P.R. Ryan, P.J. Hocking and A.E. Richardson **137–144**

Characterization of NADP-isocitrate dehydrogenase expression in a carrot mutant cell line with enhanced citrate excretion
T. Kihara, T. Ohno, H. Koyama, T. Sawafuji and T. Hara **145–153**

The influence of organic acid exudation and cluster roots on P and N acquisition

Do cluster roots of *Hakea actities* (Proteaceae) acquire complex organic nitrogen?
S. Schmidt, M. Mason, T. Sangtiean and G.R. Stewart **157–165**

***Lupinus luteus* cv. Wodjil takes up more phosphorus and cadmium than *Lupinus angustifolius* cv. Kalya**
R.F. Brennan and M.D.A. Bolland **167–185**

Chickpea and white lupin rhizosphere carboxylates vary with soil properties and enhance phosphorus uptake
E.J. Veneklaas, J. Stevens, G.R. Cawthray, S. Turner, A.M. Grigg and H. Lambers **187–197**

Role of phosphorus nutrition in development of cluster roots and release of carboxylates in soil-grown *Lupinus albus*
J. Shen, Z. Rengel, C. Tang and F. Zhang **199–206**

The influence of plant nutrition on plant growth and development of cluster roots

Effects of external phosphorus supply on internal phosphorus concentration and the initiation, growth and exudation of cluster roots in *Hakea prostrata* R.Br.
M.W. Shane, M. de Vos, S. de Roock, G.R. Cawthray and H. Lambers **209–219**

Differences in cluster-root formation and carboxylate exudation in *Lupinus albus* L. under different nutrient deficiencies
R. Liang and C. Li **221–227**

Is Fe deficiency rather than P deficiency the cause of cluster root formation in *Casuarina* species?
E.H. Zaïd, M. Arahou, H.G. Diem and R. El Morabet **229–235**

The formation, morphology and anatomy of cluster root of *Lupinus albus* L. as dependent on soil type and phosphorus supply
C.S. Peek, A.D. Robson and J. Kuo **237–246**

Localized supply of phosphorus induces root morphological and architectural changes of rice in split and stratified soil cultures
Y. He, H. Liao and X. Yan **247–256**

Interaction of nitrogen and phosphorus nutrition in determining growth
C.C. de Groot, L.F.M. Marcelis, R. van den Boogaard, W.M. Kaiser and H. Lambers **257–268**

Implications of root architecture, root-soil interactions and mycorrhiza on plant P nutrition

Phosphorus acquisition from soil by white lupin (*Lupinus albus* L.) and soybean (*Glycine max* L.), species with contrasting root development
M. Watt and J.R. Evans **271–283**

***Plantago lanceolata* L. and *Rumex acetosella* L. differ in their utilisation of soil phosphorus fractions**
A.-M. Fransson, I.M. van Aarle, P.A. Olsson and G. Tyler **285–295**

Chickpea facilitates phosphorus uptake by intercropped wheat from an organic phosphorus source
L. Li, C. Tang, Z. Rengel and F. Zhang **297–303**

Using competitive and facilitative interactions in intercropping systems enhances crop productivity and nutrient-use efficiency
F. Zhang and L. Li **305–312**

Phosphorus uptake by a community of arbuscular mycorrhizal fungi in jarrah forest
M.Z. Solaiman and L.K. Abbott **313–320**

Relationships between cluster root-bearing taxa and laterite across landscapes in southwest Western Australia: an approach using airborne radiometric and digital elevation models
W.H. Verboom and J.S. Pate **321–333**

Volume contents **335–337**

Author index **339**
